## Read Me First

Silicon Graphics, Inc. would like to welcome you to our WebFORCE™ family of products. We look forward to helping you make full use of the capabilities of the Internet and the World Wide Web. If there is anything we can do to assist you, please do not hesitate to contact us.

Before you start to use the Netsite™ Commerce Server, be sure you have read the Software License Agreement (included as a separate sheet with this package), and the following sections in Chapter 1 of your *Software Release Notes*:

- *Certificate Services*: Follow the instructions in this section to request your digitally signed certificate, which will enable you to conduct secure transactions over the Internet.

**Caution:** The Netsite Commerce Server will not run in a secure mode without a digitally signed certificate.

- *Server Safety*: Read this section for pointers on maintaining server security. This is an essential topic for anyone planning to connect to the Internet.
- *Web Services*: This section helps you get started using your Netsite Commerce Server by pointing you to some useful resources.

Your CDs contain a copy of Netscape Navigator™. You may use this copy to install and manage your Netsite server.

Again, thank you for choosing the WebFORCE line of products from Silicon Graphics, Inc.
